

# “The Greatest Invention Since The Wheel!”™

The **NEW!**  
Casterboot™

The Casterboot™ by Norgate Industries is a unique boot with a urethane wheel that slides over furniture legs and is secured with a turn of a tension bolt. The Casterboot™ allows the user the flexibility of easily installing casters on any type of round or square leg without any modification of the furniture and the convenience of removing the casters when they are not needed!

We now have two new lines of Casterboots™.

Sleek, Strong Aluminum with a beautiful satin finish, utilizing a durable polyurethane wheel, with uses ranging from commercial applications such as catering tables and store racks that require strength and versatility, to home use applications for adding mobility, convenience and style to tubular furniture legs. To make the Casterboot™ even more tempting we also re-designed two of our most popular round sizes and two new square sizes with a super strong Nylon/Fiberglass composite boot, creating a more economical option while retaining the weight capacity of the metal models!
